Customs Interaction

SADA (Automatic Solution for Customs Declarants)

- MoreData sells, supports and maintains SADA - Software designed for Custom Brokers, now also used by some Logistics Companies and Traders
- Total office management
- Upstream/downstream proprietary integration (FIAT, SEAT)
- Customs EDI via X.25 and Kermit for Import (no Export EDI available in PT Customs until 2005)
- Customs NCTS XML EDI over HTTP for Transit (manual transfer due to Customs limitations)
- Billing and accounting
- INTRASTAT EDI using EDIFACT subset (disk or e-mail transfer, due to INE limitations)

Four relevant projects

- **IAPMEI: Portuguese SMB support institution**
 - 20.000+ Investment Projects received via Internet using XML, processed in a national-wide paperless EJB system connected with several other institutions
 - MoreData built external and internal software since 2000
- **ADSE: Portuguese Public Service medical support institution**
 - Internet project to receive, process and return billing from medical services providers, connecting to an IBM S/390
- **TMN: leading Portuguese mobile telecom**
 - Information System development and maintenance
- **SEAT: automobile importer**
 - SADAAuto (SADA with automobile import module) usage
 - Integration with SEAT internal system
 - EDI with financial services provider
 - EDI with Customs and DGV

Conclusion

Knowledge, experience, commitment.
